

Shotcrete Depth Measuring Device

Technical Data Sheet

Accurate shotcrete depth measuring & Branding system

Description

The Multicrete Shotcrete Depth Measuring Device is an easy reach system used for accurate depth measuring and as a branding system. This device is a depth gauge used or installed perpendicular to the shotcrete from being placed at convenient intervals and heights, indicating the proper depth. The Shotcrete Depth Measuring Device is made from an aluminum material, reducing the overall weight, enhancing it's handling capabilities. This device supports shotcrete placement techniques for proper, high quality shotcrete applications.

Shotcrete depth measuring devices are sold complete with three different size brand options. Select three from the following (top right image):

- 2 Inch / 50 mm
- 3 Inch / 75 mm
- 4 Inch / 100 mm

The Multicrete Shotcrete Measuring Device also features a 6-foot minimum extension and 12-foot telescopic maximum extension for easy reach, accessibility to high back areas. (Image shown above.)

The shotcrete device clearly indicates the depth of shotcrete including walls and back areas (this must be used when shotcrete is wet for accurate readings.)

This device provides the best in monitoring proper shotcrete thickness, aiding in your shotcrete procedures.
