

Multicrete Lock Blocks

Technical Data Sheets

Description

Lock Blocks products are precast concrete units designed for a wide range of commercial and residential applications. They are safe, easy, and fast to assemble, offering a more efficient alternative to traditional construction. Unlike cast-in-place structures, which are expensive, time-consuming, and permanent, Lock-Block systems are cost-effective, quick to install, and can be relocated as your needs evolve.

Multicrete provides various size and orientation options for Lock Blocks, this includes:

Full Lock Block – 30” x 30” x 60”
(Approximately 2,066 kgs)

Flat Top Lock Block – 30” x 60” x 60”
(Approximately 2,042 kgs)

Half Lock Block – 30” x 30” x 30”
(Approximately 1,033 kgs)

Flat Top Half Block – 30” x 30” x 30”
(Approximately 1,021 kgs)
