

Fejmert Mobile Pan Mixer

Technical Data Sheet

Description

The Fejmert Mobile Pan Mixer is designed for efficient, high-volume mixing of flowable concrete, and low-density bulk materials. The Fejmert Mobile Pan Mixer's rotating drum is designed to ensure proper and effective blending of materials, making it ideal for applications such as conditioned ash, lightweight aggregates and liquid supported mixes.

Key Features

- Rotting drum mixer for large, continuous volumes
- Optimised for highly flowable and liquid-rich concrete
- Excellent performance with low-density bulk materials
- Low maintenance construction
- Reliability in heavily industrial environments

Typical Applications

- Ready-mix and factory concrete
- Ash conditioning in incineration plants
- Lightweight bulk materials
- Liquid-supported material streams

Fejmert Mobile Pan Mixer Specifications

FEJMERT MIXER S

MODEL	S-1125
CAPACITY IN	1125
CAPACITY OUT	500
MOTOR	2 x 15
PADDLES	7
DIAMETER (mm)	2350
WEIGHT (kg)	3800
