

RO-396

Technical Data Sheet Form Release Agent

Product Description

Multicrete is an authorized distributor of RoMix RO-396 Form Release Agent.

RO-396 Form Release Agent contains an active agent dissolved into a proprietary, state-of-the-art mineral oil carrier. RO-396 is specially formulated to be applied to clean surfaces in a thin film for best releasing performance and economy. RO-396 is most effective if sprayed. RO-396 is a read-to-use product, dilution is not recommended and can cause difficulty in stripping. RO-396 can be applied minutes or days before a job.

RO-396 meets and exceeds emissions requirements for 40 CFR part 59 form release (EPA limit 450g/l)

RO-396 Characteristics:

Clean, positive stripping, eliminates bug holes, non-regulated, non-carcinogenic, high coverage rates, non-staining, corrosion preventative, VOC compliant, non-freezing, keeps forms clean, works in all temperatures, safe and easy to use, non-hazardous, biodegradable

Typical Properties:

- Physical Form – Golden Amber Liquid
- Specific Gravity – 0.893 g/ml
- LBS per gal. – 7.15 odor – negligible
- Flash Point - 305°F – Dot Classification, non-regulated, insoluble in water

Coverage Rates:

1900-2100 square ft./gal – non-porous

1400-1800 square ft./gal – semi-porous

800-1600 square ft./gal – highly porous

NOTE – Results may vary due to conditions
